Rating My Symptoms - The Asthma Control Test™

Answer the questions below to see if your asthma symptoms are under control. Then share the results with your health-care provider. Answers are worth 1 point for *a*, 2 points for *b*, 3 points for *c*, 4 points for *d* and 5 points for *e*.

1. In the past **4 weeks**, how much of the time did your **asthma** keep you from getting as much done at work, school or at home?

a) All of the time b) Most of the time c) Some of the time
d) A little of the time e) None of the time

Score _____

2. During the past **4 weeks**, how often have you had shortness of breath?

a) More than once a day b) Once a day c) 3 to 6 times a week
d) Once or twice a week e) Not at all

Score _____

3. During the past **4 weeks**, how often did your **asthma** symptoms (wheezing, coughing, shortness of breath, chest tightness or pain) wake you up at night or earlier than usual in the morning?

a) 4 or more nights a week b) 2 or 3 nights a week c) Once a week
d) Once or twice e) Not at all

Score _____

4. During the past **4 weeks**, how often have you used your rescue inhaler or nebulizer medication (such as albuterol)?

a) 3 or more times per day b) 1 or 2 times per day c) 2 or 3 times per week
d) Once a week or less e) Not at all

Score _____

5. How would you rate your **asthma** control during the past **4 weeks**?

a) Not controlled at all b) Poorly controlled c) Somewhat controlled
d) Well controlled e) Completely controlled

Score _____

Total Score: _____

Results: If your total score is 19 or less, your asthma may not be as controlled as it could be. Ask your health-care provider what additional steps you can try. If your score is 20–25, your asthma is probably well-controlled. Your health-care provider can help you continue to keep it that way.
