

On October 1, 2015, the U.S. Environmental Protection Agency strengthened the limits on ozone pollution to better protect our health. Here's why it matters and how you can get involved.

Ozone - often called smog - has dangerous health impacts. Breathing unhealthy levels of ozone pollution is linked to:

Premature Death | Heart Problems | More Hospital Admissions
Lower Birth Weight | Asthma Attacks | Coughing and Wheezing
Central Nervous System Problems

Ozone can harm anyone, but children are at greater risk.

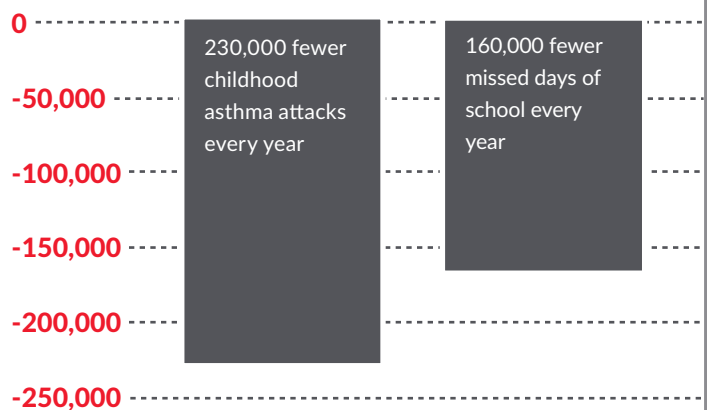

- Kids spend more time outdoors
- Kids' lungs are still developing
- Kids inhale more air for their size

73% of voters support EPA setting stricter limits on smog.

- Favor
- Strongly Favor
- Oppose

The new ozone limits will help protect kids. By 2025, meeting the new standard will mean:

You can help protect the air we breathe!
