PET?**

**DID
YOU?
KNOW!**

Tobacco smoke can give
your pet asthma, respiratory
problems & cancer.

CHANCES OF YOUR PET GETTING CANCER?

ORAL CANCER

5x higher with cats who live with secondhand smoke.

NASAL OR LUNG CANCER

3x more likely with dogs that live with secondhand smoke.

No one wants to hear the diagnosis of cancer.

It's fatal 75% of the time in cats ... within one year. And average life expectancy for your dog with cancer is 6 months.

Best chances of keeping your pet healthy? Stop smoking.

We'd like to help you.
