Asthma Program

Children's Hospital Colorado

Overview and Target Audience

You and an asthma advocate from your office (nurse, medical assistant, respiratory therapist) are invited to attend IMPACT, an innovative and evidence-based CE program designed to improve pediatric asthma outcomes in your office. **IMPACT is not a typical CE program!** With a focus on you and your practice's needs, IMPACT incorporates a problem-based approach to build upon what you already know and have applied in your practice. Each practice team will receive a **FREE** Asthma Toolkit that includes printable office tools and resources, asthma placebos and devices, and a DVD with asthma device instructions.

Objectives

Upon completion of this conference, participants should be able to:

- Solve complex diagnostic pediatric asthma dilemmas.
- Incorporate the National Heart, Lung, Blood Institute (NHLBI) Expert Panel Report-3 (EPR-3) Asthma Guidelines into practice.
- Design a concrete plan for implementing asthma management strategies and tools specific to your practice.
