

2021 Indiana Radon Poster Contest

Opportunity for Students

Radon is a colorless, odorless, tasteless, radioactive gas produced by the natural decay of uranium in the soil. Exposure to elevated radon levels increases the risk of developing lung cancer. Radon is the second leading cause of lung cancer. Approximately 1 in 3 homes tested have radon levels at or above the EPA action level of 4.0 pCi/L in Indiana. By participating in this activity, students will learn about radon and how to reduce their risk of exposure.

In order to spread the message about radon's health hazards, the Indiana State Department of Health along with the American Lung Association, host a statewide **Indiana Radon Poster Contest**. We are calling on Indiana citizens **ages 9-14** to create a radon poster that will increase public awareness of radon gas and encourage other Hoosiers to test their homes.

Awards

1st place winner will receive \$250 +\$250 for the school

2nd place winner will receive \$150

3rd place winner will receive \$100

School with most entries will receive \$250

If you have questions about the radon poster contest, please contact the Indiana Radon Hotline at 1-800-272-9723 or e-mail PosterContest@Lung.org.
