• [SPLIT A] Health problems like asthma attacks, heart disease, and lung disease, especially in children and seniors	44%	35	11	10	79%	21
• [SPLIT B] Health problems like asthma attacks, heart disease, and lung disease in the most heavily impacted communities, including communities of color.....	44%	32	16	9	76%	24
• More severe extreme weather events like storms and floods.....	38%	29	19	14	67%	33

Below are statements from supporters and opponents of Arizona shifting its investments away from fossil fuels like oil, gas, and coal and toward clean energy sources and technologies like wind, solar, and zero-emission vehicles. Please read these statements and answer the following questions.

Supporters say:

Every Arizona family deserves an opportunity to live in a healthy community - and we all have a basic responsibility to leave a better world for our kids. But unchecked pollution caused by burning dirty and outdated fossil fuels like oil, gas, and coal is endangering public health and putting the future of our children at risk.

Our dependence on fossil fuels is the main reason that Arizona has some of the most polluted air in the United States, which puts millions of Arizonans' health at risk. It also drives climate change, which 97% of scientists, NASA, and the Department of Defense all agree is a threat to our kids' future. In fact, the world's scientists recently said that the accelerating impact of climate change is a "Code Red for Humanity."

Moving to clean energy and clean technologies like zero-emission vehicles will not only dramatically reduce the carbon pollution that is disrupting our climate but will also reduce the sulfur, arsenic, and other pollutants that cause asthma attacks, heart and lung disease, and even cancer - especially in children and seniors.

And economists say that moving to clean energy and technologies will help Arizona's economy recover more quickly from the pandemic and create thousands of good-paying jobs for all kinds of people - from engineers to factory workers to installers - while eventually saving Arizona families thousands of dollars a year in energy and health care costs.

Opponents say:

Dropping inexpensive and reliable energy sources like oil, natural gas, and coal in favor of unreliable and expensive energy sources and technologies would cause electricity bills to skyrocket and force Arizona families to buy expensive electric cars, costing Arizona families thousands of dollars - all for some far-off benefits that we'll probably never even see.

Moving off tried and tested energy sources would also drive prices up for business by thousands of dollars per year, killing jobs, stifling innovation, and reversing the economic recovery that is just beginning in Arizona. Companies will be forced to send good-paying jobs to other states or countries overseas where costs are lower.

In 2018, Arizona voters rejected a proposal like this one because it was bad for Arizona for all of these reasons. But now, liberal activists who are funded by radical, out-of-state environmental groups are trying to overrule the will of the people.

We should leave renewable energy and electric transportation to the free market - not big government; if consumers want it, producers will provide it. In the meantime, it makes no sense to pass laws mandating technologies that will put reliable and affordable energy and transportation at risk and only help people rich enough to put solar panels on their homes or buy a Tesla.

v2. Now that you've read these statements, please indicate once again if you would support or oppose Arizona shifting its investments away from fossil fuels like oil, gas, and coal and toward clean energy sources and technologies like wind, solar, and zero-emission vehicles.

Strongly support	35%
Somewhat support.....	34
Somewhat oppose.....	15
Strongly oppose.....	16
SUPPORT (NET).....	68%
OPPOSE (NET).....	32

B7. And now that you've read these statements, once again, if Arizona shifts its investments away from fossil fuels like oil, gas, and coal and toward clean energy sources and technologies like wind, solar, and zero-emission vehicles, do you think it would have a positive impact, negative impact, or no impact on each of the following?

	POSITIVE		NEGATIVE		No impact	NET	
	Very	Some	Some	Very		POSITIVE	NEGATIVE
• Air quality in Arizona.....	43%	33	7	3	15	76%	9
• The health of families like yours.....	34%	35	9	6	17	68%	15
• Future generations of your family.....	41%	27	13	7	12	68%	19
• Climate change.....	39%	29	8	4	20	68%	12
• Arizona seniors and children.....	34%	30	13	12	11	64%	25
• Your family.....	27%	31	16	12	15	58%	27
• Communities of color in Arizona, including Native American communities like the Navajo Nation.....	29%	28	15	10	18	57%	25
• The economy and jobs in Arizona.....	28%	29	19	17	8	57%	35
• The finances of families like yours.....	20%	22	26	17	14	43%	43

Now there are just a few final questions for statistical purposes.

VH20. Thinking back, in the November 2020 general election for President, did you vote for Democrat Joe Biden, for Republican Donald Trump, for someone else, or did you not vote in that election?

Voted for Democrat Joe Biden.....	44%
Voted for Republican Donald Trump.....	44
Voted for someone else.....	5
Did not vote.....	7

D105. When it comes to politics, do you generally think of yourself as:

Very liberal.....	11%
Somewhat liberal.....	17
Moderate.....	37
Somewhat conservative.....	19
Very conservative.....	17
