

May 18, 2020
EPA-HQ-OA-2018-0259

I call on EPA Administrator Andrew Wheeler to withdraw EPA's proposals to censor science. EPA already relies on established, transparent science to make its decisions. The proposals will not improve this process. Instead, they would allow the agency to brush aside critical health studies that show the health impacts of air pollutants, especially the studies that polluters do not like.

My family depends on EPA following the science to protect our health. If EPA ignores critical health studies on the impacts of air pollution, we will not have safe air to breathe.

Sincerely,

Alabama:
