

May 18, 2020
EPA-HQ-OA-2018-0259

I call on EPA Administrator Andrew Wheeler to withdraw EPA's proposals to censor science. As a health professional, I understand the harms that air pollution has on patients and communities. These effects are documented by research that has already undergone a long-established, transparent review process.

Many of these studies contain confidential patient information that can't and shouldn't be made public. This is no reason to exclude those studies' critically important, well-vetted findings.

I am deeply concerned that EPA's proposals would allow the agency to censor these important health studies. Please withdraw the EPA's proposals.

Sincerely,

Alabama:
