

2024 Missouri Radon Poster Contest

Opportunity for Students

Radon is a colorless, odorless, tasteless, radioactive gas produced by the natural decay of uranium in the soil. Exposure to elevated radon levels increases the risk of developing lung cancer. Radon is the leading cause of lung cancer among non-smokers and is the number one cause of death in homes, surpassing falls, poisoning, fires, choking, and drowning. As all Missouri counties are considered at high risk, this contest provides an opportunity to educate Missouri youth and the public. By participating in this activity, students will learn about radon and to reduce their risk of exposure.

In order to spread the message about radon's health hazards, the American Lung Association and the Missouri Department of Health and Senior Services, in partnership with the U.S. Environmental Protection Agency, Region 7, and the Missouri Radon Coalition host the annual statewide Missouri Radon Poster Contest. We are once again calling on Missouri citizens ages 9-14 to create a radon poster that will increase public awareness of radon gas and encourage others to test their homes.

A state committee will select the winning posters from the entire state of Missouri to receive awards.

The poster with most votes overall will receive \$200 (1 Student Total)
1st place winner for each topic will receive \$100 (6 Students Total)
1 honorable mention for each topic will receive \$50 (6 Students Total)
The instructor for the winner of each topic will receive \$50 (7 Awards Total)

Full Contest details and additional radon information is available on the contest website at: <https://www.lung.org/local-content/mo/radon-poster>. If you have questions about the contest, please email PosterContest@lung.org.
