

2021 Illinois Radon Poster Contest

Opportunity for Students

Radon is a colorless, odorless, tasteless, radioactive gas produced by the natural decay of uranium in the soil. Exposure to elevated radon levels increases the risk of developing lung cancer. Radon is the leading cause of lung cancer among non-smokers and is the number one cause of death in homes, surpassing falls, poisoning, fires, choking, and drowning. The Illinois Emergency Management Agency estimates that 1,160 Illinois citizens die from radon related lung cancer each year. By participating in this activity, students will learn about radon and how to reduce their risk of exposure.

In order to spread the message about radon's health hazards, the Illinois Emergency Management Agency Radon Program along with the American Lung Association, CanSAR, and Respiratory Health Association of Metropolitan Chicago host the annual statewide **Illinois Radon Poster Contest**. We are once again calling on Illinois citizens **ages 9-14** to create a radon poster that will increase public awareness of radon gas and encourage other Illinoisans to test their homes.

A state committee will select the top three winning posters from the entire state of Illinois to receive awards.

1st place winner will receive \$200

2nd place winner will receive \$150

3rd place winner will receive \$100

Full Contest details and additional radon information is available on the contest website at: www.Lung.org/radon. If you have questions about the contest, please email PosterContest@lung.org.
Contest Checklist:

- ✓ Each poster has an entry form completed and attached to back of each poster.
