**Oct 01**

**Patrick Dunne, MEd, RRT, FAARC**

### **Medicare and Respiratory Home Care: What You Need To Know . . And Why**

Patrick J. Dunne, a registered respiratory therapist, is President/CEO of HealthCare Productions, Inc., a California-based professional services corporation, providing educational and training services to health care providers and professional associations nationwide. During his 40 year career, he has been the recipient of numerous achievement awards, most notably AARC's prestigious Jimmy A. Young Medal and the ARCF's Forrest M. Bird Lifetime Scientific Achievement Award. Patrick is recognized as a leading authority on the challenges facing acute hospitals and respiratory therapists in their efforts to ensure the highest quality care for patients with chronic respiratory conditions. He will describe current Medicare coverage guidelines for home oxygen care, with an eye on the steps that Medicare beneficiaries can use to help ensure the physician's prescribed equipment is ultimately obtained, – not always an easy task, but indeed often possible.

## Patient Panel: Heather Cady & Mark McCormick & Richard Harding

### Heather Cady

Heather is an RN working in Hospice. She was born with Pectus Excavatum - Jeune Syndrome, a genetic disorder, that includes scoliosis and asthma.

### Mark McCormick

Mark retired in 2014 as Project Manager at Comcast Corp. Prior to that, he was an AT&T Operations Manager for 27 years. In 2012, he was diagnosed with Idiopathic Pulmonary Fibrosis (IPF) at National Jewish Health. Since then, Mark became the Support Group Leader for the IPF group at NJH. He also the "Ambassador" for the Pulmonary Fibrosis Foundation located in Chicago, IL. As Ambassador, Mark has the opportunity to share his journey with the disease. He enjoys speaking with other groups, especially newly diagnosed patients. He let's them know patients can live much longer than the prognosis claims.

### Richard Harding

Richard had an early career as a child actor. At the age of 17 he wrote and performed 3 roles in the modern day adaptation of the Opera La Traviata, which earned the television station Emmy from the Ohio Branch of Television Arts and Sciences.

While working on a housing project in Colorado, Richard was exposed to what is believed to have been selenium, while installing an irrigation system. From January 2019 to February 2020, Richard had over 200 medical appointments, and 57 Pulmonary Rehab appointments resulting in Lung Volume Reduction Surgery, performed by Dr. Robert MeGuid at UCHealth on Valentine's Day 2020.

### Dr. Michelle Barron

**COVID-19 lessons learned, and how patients can protect themselves.**

**Dr. Michelle Barron** received her medical degree from the University of Texas Southwestern Medical School in 1996. She did her internship and residency in internal medicine at Creighton University School of Medicine from 1996-1999. From 1999-2003, Dr. Barron completed her training in infectious diseases at the University of Colorado Health Sciences Center. She joined the faculty at UCHSC in 2003 and is currently a Professor of Medicine in the Division of Infectious Diseases. In addition, she is the Medical Director of Infection Control at UCHealth University of Colorado Hospital. Dr. Barron's research interests are in infection prevention and control, transplant infectious diseases and HIV.

**Bob McCoy**

**Portable Oxygen Concentrators (POCs) Capabilities and limitations: Choosing the right device and options if POCs are not the right choice**

**Robert McCoy** has over 40 years of experience in oxygen therapy. He worked with Dr. Petty on several oxygen consensus conferences and assisted with a few of Dr. Petty's patient focused books. Roberts research of oxygen delivery systems has helped clinicians and patients understand the variability and capabilities of most home oxygen products. Robert retired last year, yet still stays current on trends and innovations in the long term oxygen therapy field.
