Re: Maine Section 1332 State Waiver Amendment Application

Dear Secretary Yellen and Secretary Becerra:

Thank you for the opportunity to submit comments on Maine's Section 1332 Waiver Amendment Application.

The undersigned organizations represent millions of individuals facing serious, acute and chronic health conditions across the country. Our organizations have a unique perspective on what patients need to prevent disease, cure illness and manage chronic health conditions. The diversity of our groups and the patients and consumers we represent enables us to draw upon a wealth of knowledge and expertise and serve as an invaluable resource regarding any decisions affecting state health insurance marketplaces and the patients that they serve. We urge the Department of the Treasury and the Department of Health and Human Services (Departments) to make the best use of the recommendations, knowledge and experience our organizations offer here.

Our organizations are committed to ensuring that any changes to the healthcare system achieve coverage that is adequate, affordable and accessible for patients. A strong, robust marketplace is essential for people with serious, acute and chronic health conditions to access comprehensive coverage that includes all of the treatments and services that they need to stay healthy at an affordable cost. Our organizations support Maine's efforts to extend its current reinsurance program to a pooled individual and small group market, and we urge the Departments to approve the application.

Reinsurance is an important tool to help stabilize health insurance markets. Reinsurance programs help

insurance companies cover the claims of very high-cost enrollees, which in turn keeps premiums affordable for other individuals buying insurance on the individual market. Reinsurance programs have been used to stabilize premiums in a number of healthcare programs, such as Medicare Part D. A temporary reinsurance fund for the individual market was also established under the Affordable Care Act and reduced premiums by an estimated 10% to 14% in its first year.¹ More recently, a data brief released by the Center for Medicare and Medicaid Services showed that states with reinsurance waivers have experienced significantly lower individual market premiums than they would have otherwise and have seen gains in insurer participation.² Maine's application is consistent with this and estimates that premiums will be lowered by 8% in the individual market and 6% in the small group market.

Maine's proposal to establish a reinsurance program will serve to lower premiums for patients, including those with pre-existing conditions, who might otherwise struggle to afford healthcare. This proposal increases health affordability and equity for patients in Maine and will help to strengthen the state's overall health insurance market. Our organizations support Maine's state reinsurance proposal and urge the Departments to approve it.

Thank you for the opportunity to provide comments.

Sincerely,

American Cancer Society Cancer Action Network
American Heart Association
American Lung Association
Arthritis Foundation
Cancer Support Community
