

## Cities and Counties on the Rise

Each year, cities and counties across the state work diligently to safeguard their residents from the harmful effects of tobacco. Our “On the Rise” communities took action in 2018 to reduce sales of tobacco products and prevent the harmful effects of secondhand smoke. For some communities, these policies represent a hard-earned first step in tobacco control policy. For others, these policies round out comprehensive measures already in place. Each of these policies represent the tangible impact that tobacco control efforts are having on communities.

These 50 “Cities and Counties on the Rise” adopted local ordinances in at least one of the four policy categories in 2018. In most cases, their actions improved their grade, but in some, the ordinance(s) only contributed to increasing the points in the particular grade category. Either way, these policies are noteworthy and deserve acknowledgement.

On the following pages are the 2018 “Cities and Counties on the Rise,” which are listed along with the grade categories in which they passed a policy. For further details about each municipality’s grades and points, including their Overall Tobacco Control grade, see the county report cards that begin on page 29.

### How Did Your Community Fare?

The Lung Association grades 540 communities in California on their tobacco control efforts.
