

GOING SMOKEFREE MATTERS

MULTIUNIT HOUSING

There is no safe amount of secondhand smoke exposure. The home is the main place many children and adults breathe in secondhand smoke.^{1,2}

- About **80 million (1 in 4) people** in the US live in **multiunit housing**, such as apartments, including about **7 million living in government-subsidized housing.**^{3,4}

*What is government-subsidized housing?
When the government helps people pay their rent.
Public housing is one type of subsidized housing.*

- Each year, an estimated **28 million** multiunit housing residents are **exposed to secondhand smoke in their home or apartment** that came from somewhere else in their building like a nearby apartment.^{3,5}
- **Every person** living in multiunit housing **deserves to breathe smokefree air.**

Smokefree

Approximately **1 in 3** multiunit housing residents are covered by **smokefree building policies.**⁵

About **8 in 10** multiunit housing residents have chosen to make their own homes smokefree.⁵

A **majority** of multiunit housing residents want smoke-free building policies.⁵
